

# Lenovo ThinkAgile VX650 V4 Hyperconverged System

## Product Guide

The Lenovo ThinkAgile VX650 V4 are 2-socket 2U systems that feature the Intel® Xeon® 6 Scalable processors (formerly code named "Granite Rapids"). The latest Lenovo ThinkAgile VX V4 Series systems are backed by the power of Intel® Xeon® 6 processors to deliver more cores, higher memory bandwidth, and enhanced AI acceleration in every core. These systems are designed to make AI accessible with new servers that are purpose-built and optimized to maximize performance and efficiency for wide range of targeted workloads, from compute-intensive AI to general-purpose data services while flexibly matching the specific workloads needs of any business. ThinkAgile VX V4 Series systems also support hardware accelerators like Graphics Processing Units (GPUs) and Data Processing Unit (DPU) cards for maximum performance and increased zero trust security capabilities. The ThinkAgile VX650 V4 provides up to 86 cores and support for the new PCIe 5.0 standard for I/O, the VX650 V4 offers the ultimate in two-socket performance in a 2U form factor. Lenovo offers a unique, software-defined approach to hyperconvergence, leveraging the hypervisor to deliver compute, storage and management in a tightly integrated solution stack based on VMware software.

Suggested uses: AI Inference, virtualization, VDI, Databases, ERP

Figure 1. Lenovo ThinkAgile VX650 V4 with 2.5-inch drive bays

## Did you know?

The ThinkAgile VX650 V4 systems are built on the Lenovo ThinkSystem SR650 V4 server that features enterprise-class reliability, management, and security.

The ThinkAgile VX650 V4 provides 4x higher performance through optimized storage compression techniques with vSAN ESA.

The VX650 V4 comes paired with Premier Support in supported countries. It offers a single point of support for quick 24/7 problem reporting and resolution.

## Key features

### ThinkAgile VX features

The ThinkAgile VX650 V4 offer the following key features:

- Factory-integrated, pre-validated ready-to-go integrated systems built on proven and reliable Lenovo ThinkSystem servers that provide compute power for a variety of workloads and applications and powered by industry-leading hyperconverged infrastructure software from VMware.
- Fully tested and validated for vSAN compliance with VMware and includes the latest supported firmware levels integrated at factory.
- Provide quick and convenient path to implement a hyperconverged solution powered by VMware Cloud Foundation (VCF) or VMware vSphere Foundation (VVF) software stacks with a single point of contact provided by Lenovo for purchasing, deploying, and supporting the solution. Licenses for VCF or VVF can be obtained by contacting a Broadcom Seller directly or a Broadcom authorized software partner.
- Meet various workload demands with performance-optimized all NVMe storage configurations.
- They also come with deployment delivered by Lenovo Professional Services and VMware software licenses.\*
- Three and Five-year hardware warranty, bundled with Premier Support in supported countries that provides a 24x7 Single Point of Support, problem reporting and resolution.

The VMware software running on ThinkAgile VX650 V4 delivers the following key features:

- Distributed architecture that allows "pay-as-you-grow", non-disruptive scaling by adding new nodes to the cluster (scale-out) to increase capacity and performance.
- Advanced capacity management, including deduplication, compression, and erasure coding (RAID 5/6), which helps deliver greater storage utilization with dramatically lower storage capacity and costs.
- Provides 4x higher performance through optimized storage compression techniques with ESA.
- Automation of VM storage provisioning and control of storage service levels (capacity, performance, availability) with VM-centric policies to load balance storage resources.
- Native HCI security solution with two-factor authentication (SecurID and CAC) and data-at-rest encryption that does not require self-encrypting drives (SEDs).
- Stretched cluster with local and site failure protection between two geographically dispersed sites for higher level of availability with near zero downtime.
- Centralized management with provisioning, administering, and monitoring virtual resources across multiple hosts and clusters from a centralized interface.
- Rapid workload provisioning, simplified data center operations, increased business efficiency, and decreased CAPEX and OPEX costs.
- VM and data protection with agent-less, image-level virtual machine backups and application-aware protection for business-critical Microsoft applications (Exchange, SQL Server, SharePoint) along with WAN-efficient, encrypted backup data replication.
- Reduced unplanned downtime and virtually eliminated planned downtime for server and storage maintenance with live workload migration, high availability, and fault tolerance.
- Enhanced application performance and availability with resource management, load balancing, and access prioritization.
- Intelligent operations management and automation to proactively monitor and manage compute, storage, and networking resources, identify performance bottlenecks, and re-balance workloads by leveraging predictive analytics.

- Capacity planning and optimization guidance to address future needs with performance trends, projections and extended forecasts.
- Managing remote offices and branch offices with rapid provisioning of servers through virtualization, minimization of host configuration drift, and enhanced visibility into regulatory compliance, across multiple sites.

\*Customers have the ability to opt out of these features. Please check sections on Software and Deployment Services for more information.

## Hardware features

The ThinkAgile VX650 V4 are based on the ThinkSystem SR650 V4 and have the following hardware features:

### Scalability and performance

The VX650 V4 offer numerous features to boost performance, improve scalability and reduce costs:

- Supports one or two Intel Xeon 6700-series or 6500-series processors with Performance-cores (P-cores)
  - Up to 86 cores and 172 threads
  - Core speeds of up to 4 GHz
  - TDP ratings of up to 350 W
- Support for DDR5 memory DIMMs to maximize the performance of the memory subsystem:
  - Up to 32 DDR5 memory DIMMs, 16 DIMMs per processor
  - 8 memory channels per processor (2 DIMMs per channel)
  - Supports 1 DIMM per channel operating at 6400 MHz
  - Supports 2 DIMMs per channel operating at 5200 MHz
  - Supports 1 MRDIMM per channel operating at 8000 MHz
  - Using 256GB 3D RDIMMs, the server supports up to 8TB of system memory
- Support for MRDIMMs for increased memory bandwidth with memory bus speeds of up to 8000 MHz.
- Supports up to 10x single-width GPUs or 2x double-wide GPUs, for substantial processing power in a 2U system.
- Supports up to 24x 2.5-inch front-accessible hot-swap drive bays.
- Supports 24x NVMe drives without oversubscription of PCIe lanes (1:1 connectivity). The use of NVMe drives maximizes drive I/O performance, in terms of throughput and latency.
- Support for up to 24x E3.S NVMe drives, a new form factor drive for high-density and high-performance storage.
- Supports high-speed controllers from Broadcom providing 12 Gb SAS connectivity to the drive backplanes. A variety of PCIe 3.0 and PCIe 4.0 RAID adapters are available.
- Supports M.2 drives for convenient operating system boot functions or data storage. M.2 drives in a RAID-1 configuration can be internally mounted or can be mounted at the front or rear of the server as hot-swap drives.
- Up to 10x PCIe slots (rear accessible), plus two slots dedicated to OCP 3.0 adapters.
- The server has up to two dedicated industry-standard OCP 3.0 slots supporting a variety of Ethernet network adapters. A simple-swap mechanism with a thumbscrew and pull-tab enables tool-less installation and removal of the adapter. The adapter supports shared BMC network sideband connectivity to enable out-of-band systems management.
- The server offers PCI Express 5.0 I/O expansion capabilities that doubles the theoretical maximum bandwidth of PCIe 4.0 (32GT/s in each direction for PCIe Gen 5, compared to 16 GT/s with PCIe Gen 4 and 8 GT/s with PCIe Gen 3). A PCIe 5.0 x16 slot provides 128 GB/s bandwidth, enough to support a dual-port 200GbE network connection.

## Availability and serviceability

The VX650 V4 provide many features to simplify serviceability and increase system uptime:

- The server offers Single Device Data Correction (SDDC, also known as Chipkill), Adaptive Double-Device Data Correction (ADDDC, also known as Redundant Bit Steering or RBS), and memory mirroring for redundancy in the event of a non-correctable memory failure. Note: ADDDC is not supported with 9x4 RDIMMs.
- The server offers hot-swap drives, supporting RAID redundancy for data protection and greater system uptime.
- Available M.2 boot adapters support RAID-1 which can enable two M.2 drives to be configured as a redundant pair.
- The server has up to two hot-swap redundant power supplies and up to six hot-swap redundant fans to provide availability for business-critical applications.
- The light path diagnostics feature uses LEDs to lead the technician to failed (or failing) components, which simplifies servicing, speeds up problem resolution, and helps improve system availability.
- Supports a new dedicated Firmware and Root of Trust Security Module that stores all system firmware settings, making it easier to transfer customer settings in the event of a system board replacement, while still maintaining data security.
- Solid-state drives (SSDs) offer more reliability and performance than traditional mechanical HDDs for greater uptime.
- Proactive Platform Alerts (including PFA and SMART alerts): Processors, voltage regulators, memory, internal storage (SSDs, NVMe SSDs, M.2 storage, flash storage adapters), fans, power supplies, RAID controllers, server ambient and subcomponent temperatures. Alerts can be surfaced through the XClarity Controller to managers such as Lenovo XClarity Administrator, and integrated into VMware vCenter. These proactive alerts let you take appropriate actions in advance of possible failure, thereby increasing server uptime and application availability.
- The built-in XClarity Controller 3 continuously monitors system parameters, triggers alerts, and performs recovery actions in case of failures to minimize downtime.
- Built-in diagnostics in UEFI, using Lenovo XClarity Provisioning Manager, speed up troubleshooting tasks to reduce service time.
- Lenovo XClarity Provisioning Manager supports diagnostics and can save service data to a USB key drive or remote CIFS share folder for troubleshooting and reduce service time.
- Auto restart in the event of a momentary loss of AC power (based on power policy setting in the XClarity Controller 3 service processor)
- Offers a diagnostics port on the front of the server to allow you to attach an external diagnostics handset for enhanced systems management capabilities.
- Support for the XClarity Administrator Mobile app running on a supported smartphone or tablet and connected to the server through the service-enabled USB port, enables additional local systems management functions.
- Three-year customer-replaceable unit and onsite limited warranty (varies by geography), 9 x 5 next business day. Optional service upgrades are available.

## Manageability and security

Systems management features simplify local and remote management of the VX650 V4:

- The server includes XClarity Controller 3 (XCC3) to monitor server availability. XCC3 Premier is included to provide remote control (keyboard video mouse) functions, support for the mounting of remote media files (ISO and IMG image files), boot capture and power capping. XCC3 Premier also offers additional features such as Neighbor Groups, System Guard, a CNSA-compliant security mode, a FIPS 140-3-compliant mode, and enhanced NIST 800-193 support.

- Dedicated Ethernet port at the rear of the server for remote management (BMC management).
- Lenovo XClarity Administrator offers comprehensive hardware management tools that help to increase uptime, reduce costs and improve productivity through advanced server management capabilities.
- UEFI-based Lenovo XClarity Provisioning Manager, accessible from F1 during boot, provides system inventory information, graphical UEFI Setup, platform update function, RAID Setup wizard, operating system installation function, and diagnostic functions.
- Support for Lenovo XClarity Energy Manager, which captures real-time power and temperature data from the server and provides automated controls to lower energy costs.
- An integrated industry-standard Unified Extensible Firmware Interface (UEFI) enables improved setup, configuration, and updates, and simplifies error handling.
- Support for industry standard management protocols, IPMI 2.0, SNMP 3.0, Redfish REST API, serial console via IPMI
- An integrated hardware Trusted Platform Module (TPM) supporting TPM 2.0 enables advanced cryptographic functionality, such as digital signatures and remote attestation.
- Administrator and power-on passwords help protect from unauthorized access to the server.
- Supports Secure Boot to ensure only a digitally signed operating system can be used. Supported with SSDs, as well as M.2 drives.
- Industry-standard Advanced Encryption Standard (AES) NI support for faster, stronger encryption.
- Intel Execute Disable Bit functionality can prevent certain classes of malicious buffer overflow attacks when combined with a supported operating system.
- Intel Trusted Execution Technology provides enhanced security through hardware-based resistance to malicious software attacks, allowing an application to run in its own isolated space, protected from all other software running on a system.
- Additional physical security features are an available chassis intrusion switch and available lockable front bezel.

## Energy efficiency

The VX650 V4 offer the following energy-efficiency features to save energy, reduce operational costs, and increase energy availability:

- The server supports advanced Lenovo Neptune Core direct-water cooling (DWC) capabilities, where heat from key components is removed from the rack and the data center using an open loop and coolant distribution units, resulting in lower energy costs:
  - Processor Neptune Core Module uses liquid cooling to remove heat from the processors
- Energy-efficient system board components help lower operational costs.
- Carbon offset is available at click of button. You can project the carbon emissions per device for an average lifecycle (up to 5 years). That information is available [here](#)
- High-efficiency power supplies with 80 PLUS Platinum and Titanium certifications
- Solid-state drives (SSDs) consume as much as 80% less power than traditional spinning 2.5-inch HDDs.
- Support for Lenovo XClarity Energy Manager provides advanced data center power notification, analysis, and policy-based management to help achieve lower heat output and reduced cooling needs.
- The server uses hexagonal ventilation holes, which can be grouped more densely than round holes, providing more efficient airflow through the system and thus keeping your system cooler.

## Components and connectors

The ThinkAgile VX650 V4 are based on the ThinkSystem SR650 V4 server.

The following figure shows the front of the ThinkAgile VX650 V4 with 2.5-inch drives.

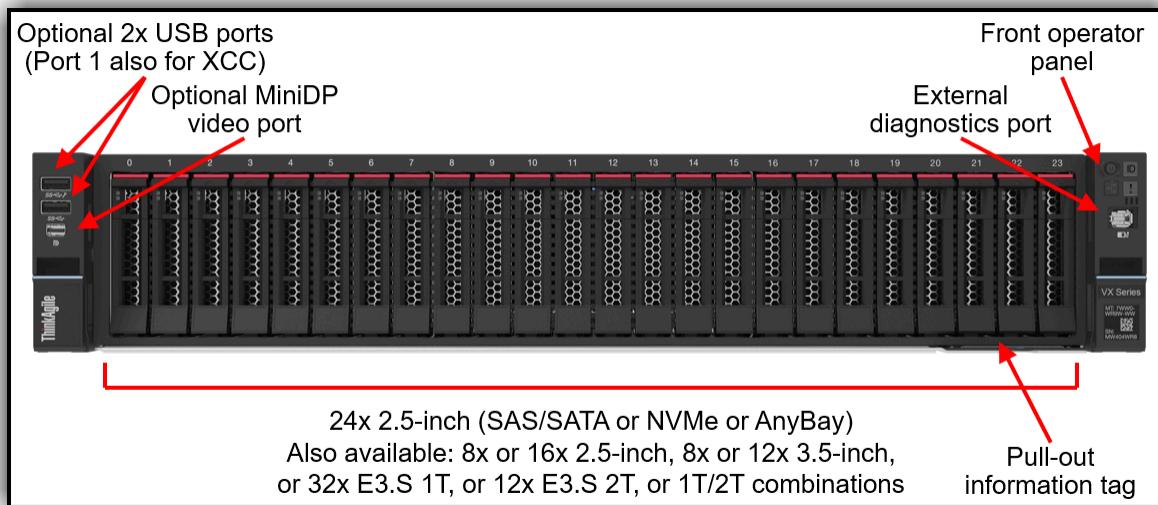

Figure 2. Front view of the ThinkAgile VX650 V4 with 2.5-inch drives

The following figure shows the components visible from the rear of the system. The figure shows one configuration, with ten PCIe slots, however there are additional rear configurations which 2.5-inch drive bays.

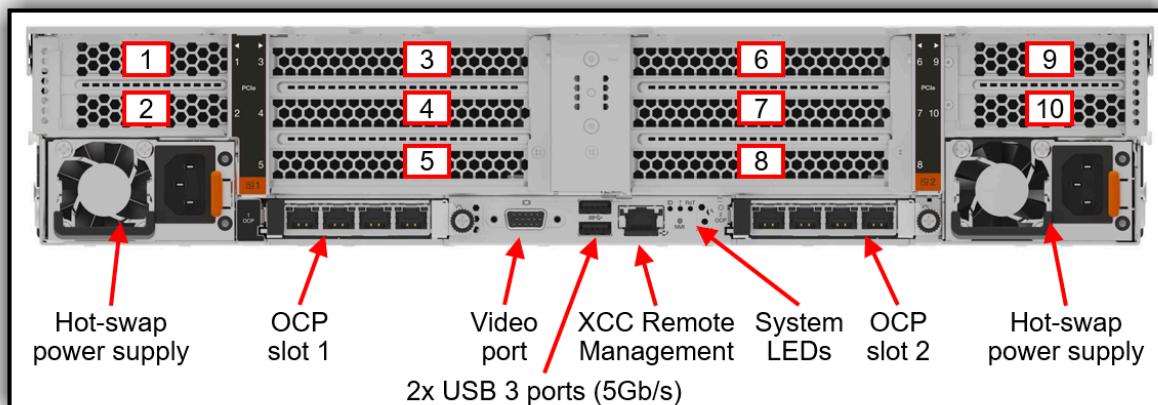

Figure 3. Rear view of the ThinkAgile VX650 V4 systems (configuration with ten PCIe slots)

The following figure shows the locations of key components inside the systems.

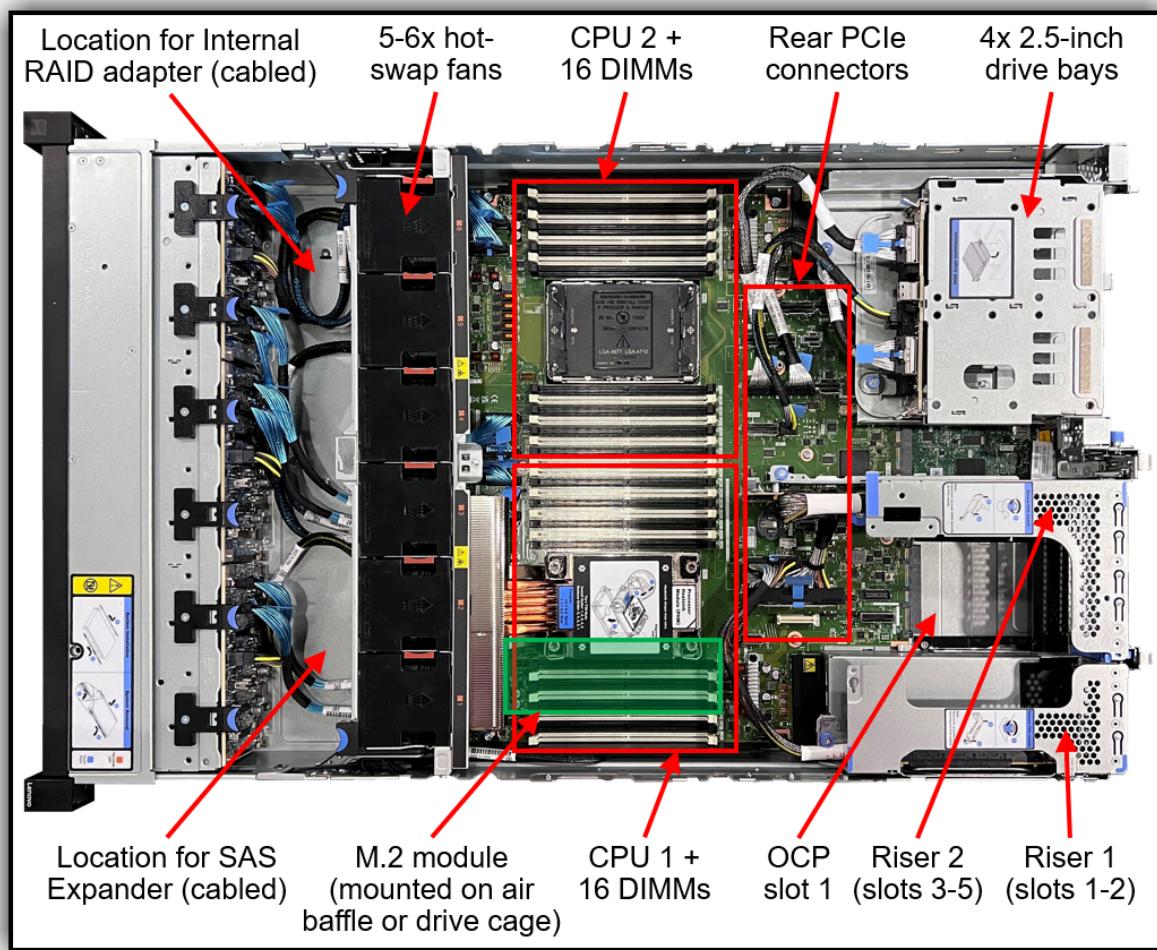

Figure 4. Internal view of the ThinkAgile VX650 V4 systems

## Standard specifications

The ThinkAgile VX650 V4 are based on the ThinkSystem SR650 V4 server.

The following table provides an overview of the ThinkAgile VX 650 V4 systems.

Table 1. List of features

ThinkAgile VX650 V4	
Target workloads	Cloud, AI/ML, Database, VDI
Base MTM	7DG6CTO1WW
Form Factor	2U
Base platform	SR650 V4
Max Cluster Size	64 Hosts
CPU	1x or 2x Intel® Xeon® 6 (Granite Rapids-SP)
Memory	<ul style="list-style-type: none"> <li>• DDR5 memory operating up to 8000 MHz</li> <li>• 8 channels per CPU</li> <li>• 32 DIMMs (16 per processor), 2 DIMMs per channel</li> <li>• Supports RDIMMs, 3DS RDIMMs, and MRDIMMs</li> <li>• Up to 8TB of system memory</li> </ul>
Drive Bays	<ul style="list-style-type: none"> <li>• Up to 24x 2.5" drive bays, 24x E3.S</li> <li>• Front: up to 24x2.5"/ 24x E3.S, hot-swap</li> <li>• 2x Internal M.2 with optional RAID 1</li> <li>• 2x front or rear hot-swap M.2 with RAID 1</li> <li>• PCIe 5.0 NVMe drive support</li> <li>• 24x Onboard NVMe ports</li> </ul>
Drive configurations	All Flash
Boot drives	2x M.2 SATA
OCP networking	2x OCP 3.0 adapter 1Gb, 10Gb, 25Gb, 100Gb
PCIe networking	Up to 10x adapters 1Gb, 10Gb BASE-T, 10Gb, 25Gb, 100Gb, 200Gb
DPU- Smart NIC	None
GPUs	<ul style="list-style-type: none"> <li>• Supports up to 10x single-wide GPUs</li> <li>• Supports up to 2x double-wide GPUs</li> </ul>
Hypervisor	ESXi 8.0u3 (Factory Installed) ESXi 9.0 (Factory Installed)

The following table lists the standard specifications.

Table 2. Standard specifications

Components	Specification
Machine types	7DG6 - 3 or 5 year warranty
Form factor	2U rack.
Cluster Size	<p>With Lenovo ThinkAgile VX Series &amp; VMware Cloud Foundation (VCF), you need a minimum of 4 nodes to create a management domain cluster.</p> <p>With Lenovo ThinkAgile VX Series &amp; VMware vSphere Foundation (VVF), you can create a vSAN cluster with a minimum 3 hosts* and a maximum of 64 hosts. Requires 8.0 u3 and later releases.</p> <p>*Supports 2-node vSAN cluster deployment with a vSAN witness appliance deployed as a virtual machine or hardware appliance, typically in remote office/branch offices (ROBO) use cases and requires VMware vSphere Foundation (VVF) software license.</p>
Processor	One or two Intel Xeon 6700P-series or 6500P-series processors (formerly codenamed "Granite Rapids-SP"). Supports processors up to 86 cores and 172 threads, core speeds of up to 4.0 GHz, and TDP ratings of up to 350 W.
Chipset	None. Integrated into the processor
Memory	32 DIMM slots with two processors (16 DIMM slots per processor). Each processor has 8 memory channels, with 2 DIMMs per channel (DPC). Lenovo TruDDR5 RDIMMs are supported. DIMMs operate at up to 6400 MHz at 1 DPC and up to 5200 MHz at 2 DPC. Xeon 6500P and 6700P-series processors also support MRDIMMs up to 8000 MHz at 1 DPC.
Memory maximum	Up to 8TB by using 32x 256GB 3DS RDIMMs
Memory protection	ECC, SDDC (for x4-based memory DIMMs), ADDDC (for x4-based memory DIMMs), and memory mirroring.
Disk drive bays	<p>24x 2.5-inch or 24x E3.S hot-swap drive bays:</p> <ul style="list-style-type: none"> <li>Front bays can be 2.5-inch (8, 16 or 24 bays), or E3.S (16 bays)</li> <li>Combinations of NVMe, or AnyBay (supporting NVMe) are available</li> </ul> <p>M.2 support for OS boot:</p> <ul style="list-style-type: none"> <li>2x front or rear hot-swap M.2 drive bays, or</li> <li>Internal M.2 module supporting up to two M.2 drives</li> </ul>
Storage controller	<ul style="list-style-type: none"> <li>Up to 24x Onboard NVMe ports</li> </ul>
Network interfaces	Two dedicated OCP 3.0 SFF slots with a PCIe 5.0 host interface, either x8 or x16. Support a variety of 2-port and 4-port adapters with up to 400 GbE network connectivity. One port of each installed OCP adapter can optionally be shared with the XClarity Controller 3 (XCC3) management processor for Wake-on-LAN and NC-SI support.

Components	Specification
PCIe slots	<p>Up to 10x slots, all at the rear, plus 2x OCP slots. All slots are PCIe 5.0. The use of Riser 3 and 4 requires 2 processors.</p> <ul style="list-style-type: none"> <li>• Riser 1: 2x low-profile slots, x8 or x16 (CPU 1)</li> <li>• Riser 2: 3x full-height slots, two x16 and one x8 (CPU 1)</li> <li>• Riser 3: 3x full-height slots, two x16 and one x8 (CPU 2)</li> <li>• Riser 4: 2x low-profile slots, x8 or x16 (CPU 2)</li> </ul> <p>The server also supports rear 2.5" or 3.5" drive bays, and rear hot-swap M.2 drives, instead of some slots. If the server has 8x 2.5-inch rear drive bays, then Riser 1 slots are full-height.</p> <p>All configurations include at the rear of the server:</p> <ul style="list-style-type: none"> <li>• 2x OCP slots with PCIe 5.0 x16 or x8 connection</li> </ul> <p>For 2.5-inch front drive configurations, the server supports the installation of a CFF RAID adapter in a dedicated area that does not consume any of the rear PCIe slots.</p>
GPU support	Support for up to 10x single-wide GPUs or 2x double-wide GPUs
Ports	<p>Front: External diagnostics port, optional 2x USB 3 (5 Gb/s) port, one supports XCC local management, optional Mini DisplayPort (miniDP) v1.1a video port.</p> <p>Rear: 2x USB 3 (5 Gb/s) ports, 1x VGA video port, 1x RJ-45 1GbE systems management port for XCC remote management. Optional DB-9 COM serial port (installs in a slot). Support for an optional second RJ-45 1GbE systems management port for XCC remote management (installs in OCP adapter slot). Support for an optional adapter to share an incoming remote management network connection across 4 servers (installs in an OCP slot).</p> <p>Internal: Optional 1x USB 3 (5 Gb/s) connector for operating system or license key purposes</p>
Cooling	6x (with two processors installed) or 5x (with one processor installed) single-rotor or dual-rotor hot swap 60 mm fans, configuration dependent. Fans are N+1 redundant, tolerating a single-rotor failure. One fan integrated in each power supply. For customers with water infrastructure in their data center, the server also supports open-loop water cooling for efficient heat removal.
Power supply	Up to two hot-swap redundant AC power supplies, 80 PLUS Platinum or 80 PLUS Titanium certification. 800W, 1300W, 2000W, 2700W and 3200W AC options. All AC power supplies support 230V power; some also support 115V input supply. In China only, all power supply options support 240 V DC. Support for HVDC and -48V DC power supply options.
Video	Embedded graphics with 16 MB memory with 2D hardware accelerator, integrated into the XClarity Controller 3 management controller. Two video ports (rear VGA and optional front Mini DisplayPort); both can be used simultaneously if desired. Maximum resolution is 1920x1200 32bpp at 60Hz.
Hot-swap parts	Drives, power supplies, and fans.
Systems management	Operator panel with status LEDs. Optional External Diagnostics Handset with LCD display. Clarity Controller 3 (XCC3) embedded management based on the ASPEED AST2600 baseboard management controller (BMC), XClarity Administrator centralized infrastructure delivery, XClarity Integrator plugins, and XClarity Energy Manager centralized server power management. Optional XCC3 Premier to enable remote control functions and other features
Security features	Chassis intrusion switch, Power-on password, administrator's password, Root of Trust module supporting TPM 2.0 and Platform Firmware Resiliency (PFR). Optional lockable front security bezel.
Software	See <a href="#">Software Section</a> :
Hypervisors	VMware ESXi. See <a href="#">Operating system support</a> section for details.
Limited warranty	Three or Five-year (model dependent) customer-replaceable unit and onsite limited warranty with 9x5 next business day (NBD).

Components	Specification
Service and support	Optional service upgrades are available through Lenovo Services: 4-hour or 2-hour response time, 6-hour fix time, 1-year or 2-year warranty extension, software support for Lenovo hardware and some third-party applications.
Dimensions	Width: 445 mm (17.5 in.), height: 87 mm (3.4 in.), depth: 796 mm (31.3 in.)
Weight	Maximum weight: 38.8 kg (85.5 lb)

## Models

Factory-integrated models are configured by using the Lenovo Data Center Solution Configurator (DCSC), <http://dcsc.lenovo.com>

To ensure that the controlled GPUs and accelerators are only sold in the supported markets, the following configure-to-order base machine-type models (CTO MTMs) are selectable in DCSC:

- **Standard Open models** are available in all markets worldwide. Controlled GPUs cannot be configured using these models. These are CTO1WW models.

Tip: It is highly recommended to engage a Lenovo representative early in a project that includes the ThinkAgile VX Series Integrated Systems and Certified Nodes

The following table lists the base CTO models.

Table 3. CTO base models

Server model	Standard Open models
	These CTO models are available in all markets.
ThinkAgile VX650 V4	7DG6CTO1WW

## Comparison with the ThinkSystem SR650 V4

The ThinkAgile VX650 V4 are based on the ThinkSystem SR650 V4 server, however there are key differences:

- No HBA support
- No vROC support
- RAID adapter supported for boot only
- Encryption not supported on SED drives
- Fibre Channel support for use cases like data migration
- No InfiniBand support
- ESA configurations only consist of a storage tier, no cache drives or disk groups required

For details about the ThinkSystem SR650 V4, see the SR650 V4 product guide:

<https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server>

To verify what specific hardware components are supported with the VX650 V4, see the DCSC configurator: [https://dcsc.lenovo.com](http://dcsc.lenovo.com)

## Processors

The ThinkAgile VX650 V4 supports processors 6th Gen Intel Xeon Scalable Processor family.

- [6th Gen Intel Xeon Scalable processors](#)
- [Lenovo Processor Neptune Core Module - Open-loop liquid cooling](#)

### 6th Gen Intel Xeon Scalable processors

The VX650 V4 systems support the following processors. The systems support 1 or 2 processors installed.

For details about these options, including configuration rules, see the SR650 V4 product guide:

<https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#processors>

Table 4. Granite Rapids Processor choices

Part number	Feature	Description	Mainstream	Maximum supported
				VX650 V4
None	C5QQ	Intel Xeon 6505P 12C 150W 2.2GHz Processor	Mainstream	2
None	C5R6	Intel Xeon 6507P 8C 150W 3.5GHz Processor	Mainstream	2

None	C5QW	Intel Xeon 6761P 64C 350W 2.5GHz Processor	Extended	1
None	C5QY	Intel Xeon 6767P 64C 350W 2.4GHz Processor	Mainstream	2
None	C5QP	Intel Xeon 6781P 80C 350W 2.0GHz Processor	Extended	1
None	C5QM	Intel Xeon 6787P 86C 350W 2.0GHz Processor	Mainstream	2

\*Minimum of 16 cores is required for ESA configurations.

## Lenovo Processor Neptune Core Module - Open-loop liquid cooling

The VX650 V4 also supports advanced direct-water cooling (DWC) capability with the Lenovo Processor Neptune Core Module. This module implements a liquid cooling solution where heat from the processors is removed from the rack and the data center using an open loop and coolant distribution units.

With the Processor Neptune Core Module, all heat generated by the processors is removed from the server using water. This means that the server fans and data center air conditioning units only need to remove the heat generated by the other components. This results in lower air conditioning costs and it enables the use of slower fans which results in lower overall power consumption.

Internal testing has shows a 63% fan power saving per node and 24.7% rack-level power saving with the use of open-loop liquid cooling. Power savings are configuration dependent.

**Lenovo Professional Services review is required:** Lenovo Processor Neptune Core Module (Direct Water Cooled/Open Loop) requires additional water infrastructure. The factory integration of components such as in-rack CDUs and manifolds requires Lenovo Professional Services review and approval for warranty and associated extended services. Before ordering, contact the Lenovo Professional Services team ([CDUsupport@lenovo.com](mailto:CDUsupport@lenovo.com) ).

The following figure shows the Lenovo Processor Neptune Core Module.

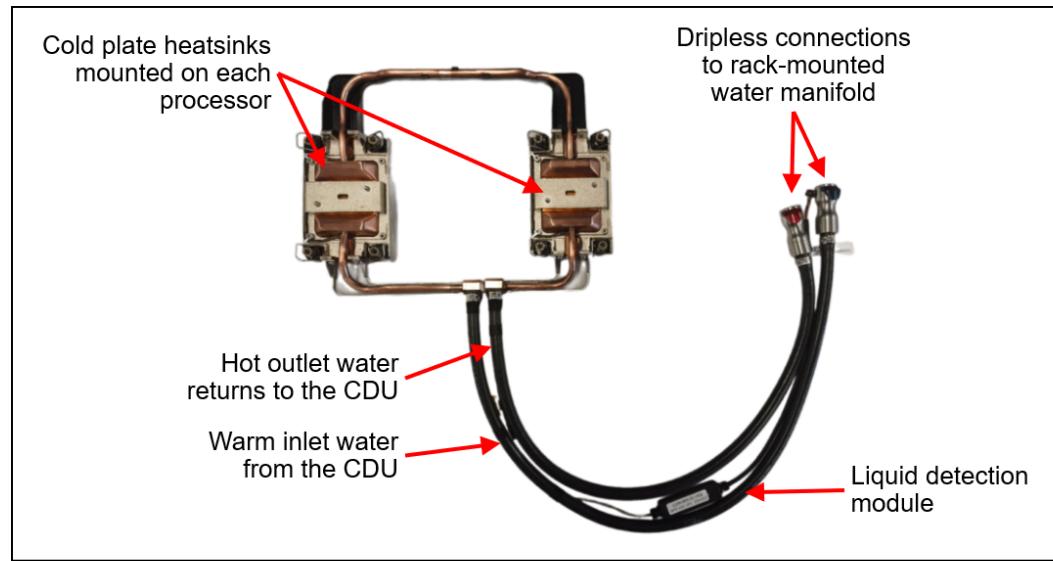

Figure 5. Lenovo Processor Neptune Core Module

The Processor Neptune Core Module also includes a leak detection module which can detect a leakage of more than 0.5ml (about 10 drops) along the length of the tube and then issue an event to the XClarity Controller. XCC will then post an error to the System Event Log and enable further actions. Once the liquid evaporates, a further event is issued to XCC.

The Processor Neptune Core Module is only available in CTO orders, not as a field upgrade. Ordering information is listed in the following table.

Table 5. Lenovo Processor Neptune Core Module

Part number	Feature code	Description
CTO only	C1XH*	ThinkSystem V4 1U/2U Processor Neptune Core Module

\* In DCSC, this feature code is listed in the Processor tab

Configuration notes:

- The Processor Neptune Core Module requires water infrastructure be available in the rack cabinet and data center, as described in the [Water infrastructure](#) section.
- All processor SKUs are supported
- Either one or two CPUs are supported
- All front drive bay configurations are supported
- Slot 8 is not available for adapters - the water loop is routed through the space otherwise occupied by slot 8
- Rear drive bays are supported
- M.2 adapters are supported based on the configurations in the [Storage configurations](#) section
- Standard fans can be configured in most configurations
- The use of a cable management arm (CMA) is not supported

For more information, see the Thermal Rules page:

[https://pubs.lenovo.com/sr650-v4/thermal\\_rules](https://pubs.lenovo.com/sr650-v4/thermal_rules)

## Memory

### 6th Generation Memory options

The VX650 V4 systems support the following 6th generation memory options. The VX650 V4 uses Lenovo TruDDR5 memory operating at up to 8800 MHz. The server supports up to 32 DIMMs with 2 processors. The processors have 8 memory channels and support 2 DIMMs per channel (DPC). The server supports up to 8TB of memory using 32x 256GB RDIMMs and two processors.

DIMMs operate at the following speeds, up to the memory bus speed of the processor selected. See the [Processor features](#) section for specifics.

- RDIMMs and 3DS RDIMMs:
  - 1 DIMM per channel: Up to 6400 MHz
  - 2 DIMMs per channel using RDIMMs: Up to 5200 MHz
- MRDIMMs (support for MRDIMMs is processor-model dependent)
  - 1 DIMM per channel: 8000 MHz

For details about these options, including configuration rules, see the SR650 V4 product guide: <https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#memory>

Table 6. Granite Rapids Memory options

Part number	Feature	Description	Maximum supported
<b>VX650 V4</b>			
<b>x4 RDIMMs</b>			
4X77A90964	C0U9	ThinkSystem 32GB TruDDR5 6400MHz (1Rx4) RDIMM	32

<b>3DS RDIMMs</b>			
4X77A90994	C0U0	ThinkSystem 256GB TruDDR5 6400MHz (4Rx4) 3DS RDIMM	32
<b>MRDIMMs (operate at 8000 MHz in the VX650 V4) (Note: Not all processors support MRDIMMs - see Processor features)</b>			
4X77A90998	C0TY	ThinkSystem 32GB TruDDR5 8800MHz (2Rx8) MRDIMM	32
4X77A90999	C0TX	ThinkSystem 64GB TruDDR5 8800MHz (2Rx4) MRDIMM	32

## Internal storage

The VX650 V4 has three drive bay zones and supports up to 24x 2.5-inch hot-swap drive bays or a combination of drive bays, depending on the selected chassis and backplane configuration. The server also supports configurations with E3.S 1T and E3.S 2T drive bays. The server supports configurations without any drive bays if desired.

The drive bay zone is as follows:

- Front:
  - Up to 24x 2.5-inch hot-swap bays, or
  - Up to 24x E3.S 1T or 12x E3.S 2T hot-swap drive bays (or a mix of 1T/2T drive bays)

All drives are hot-swap and are accessible from the front, from the rear, or from drive bays that are located in the middle of the server (accessible when you remove the top cover of the server).

The server also supports one or two M.2 drives, in three possible locations, configuration dependent:

- Installed in an M.2 adapter internal to the server (non-hot-swap)
- Hot-swap in the rear of the server
- Hot-swap in the front of the server

For details about NVMe drives see the the SR650 V4 product guide:

<https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#nvme-drive-support>

For details about these options, including configuration rules, see the SR650 V4 product guide:

<https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#internal-storage>

Table 7. Drive backplanes

Part number	Feature	Description	Maximum supported
<b>Front 2.5-inch drive backplanes</b>			
None	C46P	ThinkSystem 2U V4 8x2.5" NVMe Backplane	3
<b>Front E3.S drive backplanes</b>			
None	C221	ThinkSystem V4 EDSFF E3.S 4x1T NVMe Gen5 Backplane	6

For OS boot functions, the systems also support one M.2 hot-swap drives at the rear of the server, or one or two M.2 drives installed on an adapter internal to the server. The following table lists the supported controllers/enablement kits for M.2 boot drives.

For details about these options, including configuration rules, see the SR650 V4 product guide:  
<https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#internal-storage>

Table 8. Boot Drive Enablement

Part number	Feature	Description	Maximum supported
			<b>VX650 V4</b>
<b>Front M.2 enablement kits</b>			
4XH7B03857	C217	ThinkSystem M.2 RAID B540d-2HS SATA/NVMe Enablement Kit - Controller Board	1

<b>Internal M.2 (non-hot-swap)</b>			
4Y37A93746	C26V	ThinkSystem M.2 RAID B545i-2i SATA/NVMe Adapter	1

## Internal drive options

This section lists the supported drives:

- [Boot drives](#)
- [Internal drives for VX650 V4](#)

Configuration Note:

- Express Storage Architecture (ESA) supports a minimum of 1 drives and a maximum of 24 drives. Please reference the [vSAN ESA ReadyNode Hardware Guidance](#) for additional requirements.
- VMware vSAN certification for Generic NVMe drives: The drives are listed in the [Broadcom Compatibility Guide](#) (BCG) under the drive vendor company name instead of Lenovo. To check a drive for vSAN certification, search the VCG using the Supplier part number. Part numbers can be found using the Product Guide for the corresponding Drive Family on Lenovo Press [https://lenovopress.lenovo.com/servers/options/drives#sort=last\\_update](https://lenovopress.lenovo.com/servers/options/drives#sort=last_update).

## Boot drives

The VX650 V4 systems support the following drive for boot functions.

Table 9. Boot drives

Part number	Feature	Description	Maximum supported

## Network adapters

The VX650 V4 systems support the following networking options.

For details about these options, including configuration rules, see the SR650 V4 product guide:

<https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#i-o-expansion>

<https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#network-adapters>

Table 11. OCP network adapters

Part number	Feature	Description	Maximum supported
			VX650 V4
<b>Gigabit Ethernet</b>			
4XC7A08235	B5T1	ThinkSystem Broadcom 5719 1GbE RJ45 4-port OCP Ethernet Adapter	2

## GPU adapters

The ThinkAgile VX650 V4 systems support the following GPU options.

For details about these options, including configuration rules, see the SR650 V4 product guide: <https://lenovopress.lenovo.com/lp2127-thinksystem-sr650-v4-server#gpu-adapters>

To ensure that the controlled GPUs and accelerators are only sold in the supported markets, the following configure-to-order base machine-type models (CTO MTMs) are selectable in DCSC:

- **Standard Open models** are available in all markets worldwide. Controlled GPUs cannot be configured using these models. These are CTO1WW models.

**Note:** It is highly recommended to engage a Lenovo representative early in a project that includes the ThinkAgile VX Systems

Table 13. GPU adapters

Part number	Feature	Description	Maximum supported
			VX650 V4
<b>Single-wide GPUs</b>			
4X67A84824	BS2C	ThinkSystem NVIDIA L4 24GB PCIe Gen4 Passive GPU	10

## Fibre Channel host bus adapters

Table 14. Fibre Channel host bus adapters

Part number	Feature	Description	Maximum supported
<b>64 Gb Fibre Channel HBAs</b>			
4XC7A96744	C4L3	ThinkSystem QLogic QLE2872 64Gb 2-Port PCIe Fibre Channel Adapter(Generic FW)	10
4XC7A96458	C5FD	ThinkSystem Emulex LPe38102 64Gb 2-Port PCIe Fibre Channel Adapter	10
<b>32 Gb Fibre Channel HBAs</b>			
4XC7A08276	BA1F	ThinkSystem QLogic QLE2772 32Gb 2-Port PCIe Fibre Channel Adapter	10
4XC7A96457	C5FC	ThinkSystem Emulex LPe37102 32Gb 2-Port PCIe Fibre Channel Adapter	10

## Operating system support

The ThinkAgile VX650 V4 supports the following operating systems:

- ESXi 9.0 (Factory Installed)
- ESXi 8.0u3 (Factory Installed)

Configuration Note:

On the ThinkAgile VX650 V4, the ESXi version to be installed is selected on the ThinkAgile VX Deployer.\*\* The system ships out of the factory with the Feature Code (FC) BLA3 which includes the Lenovo custom image with the VX Deployer SW installed as a VM. The customer can then use the VX Deployer tool to select the ESXi version of their choice and follow the step-by-step installation process to deploy/install/activate/configure vSphere, vSAN, vCenter, LXCi (HSM), etc. Once the deployer completes its activity, the customer follows the regular management flow using vCenter.

VMware vSAN certification for Generic NVMe drives: The drives are listed in the [Broadcom Compatibility Guide](#) (BCG) under the drive vendor company name instead of Lenovo. To check a drive for vSAN certification, search the BCG using the Supplier part number. Part numbers can be found using the Product Guide for the corresponding Drive Family on Lenovo Press [https://lenovopress.lenovo.com/servers/options/drives#sort=last\\_update](https://lenovopress.lenovo.com/servers/options/drives#sort=last_update).

For further details, including any restrictions, see the OS Interoperability Guide: <https://lenovopress.lenovo.com/osig#term=vx&support=all>

\*\*Phase 1 of VX650 V4 will not be shipped with the VX Deployer (FC: BLA3) and customer will have the ability to select the preferred version of ESXi to be factory installed. Phase 2 delivery will ship with this factory installed feature.

## Software

ThinkAgile VX Series offerings support VMware Cloud Foundation (VCF) and VMware vSphere Foundation (VVF) primary software stack options. Subscription Licenses can be purchased by contacting Broadcom Seller directly or a Broadcom authorized software partner. It is recommended that the VMWare subscription license should match the length of the Lenovo hardware warranty, 3-year or 5-year durations. In addition to the primary stack options, advanced service options are available for features like vSAN additional capacity, Live Recovery, Firewall with Advanced Threat Prevention and Avi Load Balancer, Private AI Foundation is no longer a standalone add-on but part of the VCF license.

The following VMware subscription software license are available for purchase by contacting a Broadcom Seller directly or a Broadcom authorized software partner.:

- Primary Software
  1. VMware Cloud Foundation (VCF)
  2. VMware vSphere Foundation (VVF)

For the current list of available add-ons for the VMware primary software, see the Broadcom feature comparison document. <https://www.vmware.com/docs/vmware-cloud-foundation-9-0-feature-comparison-and-upgrade-paths>.

### Configuration notes:

- For more information on ThinkAgile VX Series Hardware needed for the respective VMware license quantities, please use the VMware SW license calculator at <https://lets.lenovo.com/vlets-calculator/>.

## ThinkAgile VX Deployer Tool

The ThinkAgile VX Deployer tool is a web-based UI tool used to simplify and automate the deployment of Lenovo ThinkAgile VX systems within your VMware environment. The ThinkAgile VX Deployer tool can install and configure the following software:

### VMware ESXi

VMware ESXi is a bare-metal hypervisor that the ThinkAgile VX Deployer tool installs on the hardware of each host in the cluster. ESXi translates requests between the physical and virtual resources, making virtualization possible.

### VMware vCenter Server

VMware vCenter Server is a management console that provides a centralized platform for controlling VMware vSphere environments. One service that runs in VMware vCenter Server is VMware vLCM, which provides centralized and simplified management to install software, maintain that software through updates and upgrades, and decommission it.

### Lenovo® XClarity Integrator

Lenovo XClarity Integrator is the hardware support manager (HSM) used by vCenter for firmware upgrades. Lenovo XClarity Integrator fully integrates with VMware vLCM to give the VMware vCenter Server software visibility into Lenovo hardware. The interface for the ThinkAgile VX Deployer tool is a straightforward web-based installation wizard with three top-level options:

- Install a new cluster (using the wizard).
- Add nodes to an existing cluster (using the wizard).
- Use a configuration file to install a new cluster or add nodes to an existing cluster.

Prowess testing included all three of these options, plus some key lifecycle-management features in VMware vCenter Server. To view the results of our testing please use the link <https://prowessconsulting.com/wp->

## **Warranty and Support**

The VX650 V4 has a 3 or 5-year warranty based on the machine type:

- 7DG6 - 3 or 5 year warranty

The ThinkAgile VX Series can be configured with a three- or five-year hardware warranty with 24x7 ThinkAgile Advantage Single Point of Support and various levels of coverage with a well-defined scope of services, including service hours, response time, term of service, and service agreement terms and conditions.

The Lenovo local support centers perform Premier determination and resolution for hardware-related issues and escalate to Broadcom, on behalf of the customer, for software-related problem determination. Broadcom will contact the customer and will own the software-related problem resolution until closure.

Our global network of regional support centers offers consistent, local-language support enabling you to vary response times and level of service to match the criticality of your support needs:

- **Standard Next Business Day** – Best choice for non-essential systems requiring simple maintenance.
- **Premier Next Business Day** – Best choice for essential systems requiring technical expertise from senior-level Lenovo engineers.
- **Premier 24x7 4-Hour Response** – Best choice for systems where maximum uptime is critical.
- **Premier Enhanced Storage Support 24x7 4-Hour Response** – Best choice for storage systems where maximum uptime is critical.

For more information, consult the brochure [Lenovo Operational Support Services for Data Centers Services](#).

## **Software maintenance**

The software maintenance from Broadcom for ThinkAgile VX Series should match the three-, or five-year duration of the selected Lenovo hardware warranty period that entitles customers to submit service requests to troubleshoot VMware software issues and receive code updates, including fixes, patches, and new software releases.

The Lenovo local support centers perform problem determination and resolution for hardware-related issues and escalate to Broadcom, on behalf of the customer for software-related problem determination. Lenovo will contact the customer and will own the software-related problem resolution until closure.

## Deployment services

The following optional Lenovo basic installation services are available for the ThinkAgile VX Series Integrated Systems (appliances):

- Unpacking and inspecting the systems
- Mounting the systems in a rack cabinet
- Connecting the systems to electrical power and network
- Checking and updating firmware to the latest levels
- Verifying operations
- Disposal of the packaging materials (within the customer site)

ThinkAgile VX Integrated Systems include deployment services delivered by Lenovo Professional Services for the ultimate customer experience. However, “Channel Partner Provided” option is also available on DCSC. By choosing this option, Lenovo Customer or Lenovo Business Partner assumes the full responsibility to perform the deployment services for the quoted system. It is strongly recommended that Lenovo Professional Services or approved business partners are used to perform the deployment services.

The following additional Lenovo deployment services are available for the ThinkAgile VX Series with VMware vSphere Foundation solution to get customers up and running quickly. You can use the table below to add these services:

- Conducting remote preparation and planning
- Verifying firmware versions and performing firmware updates, if needed
- Configuring XCC management settings
- Configuring hypervisor settings
- Configuring vSAN
- Configuring VMware vCenter Server and discovering hosts and storage
- Configuring Lenovo XClarity network settings and performing discovery and inventory
- Transferring knowledge
- Developing post-installation documentation

The following Lenovo deployment services are provided with the ThinkAgile VX Series with VMware Cloud Foundation co-engineered solution to get customers up and running quickly:

- Planning and Design
  - Collect technical details for hardware and VMware environment
  - Plan the architecture based on Customer's business and tech requirements
  - Fill the VCF Plan, Prepare Workbook
- Implementation
  - Configure hardware (XCC IP, UEFI), upgrade firmware via OneCLI or BoMC
  - Deploy & Configure ESXi, Cloud Builder & import VCF Workbook, Lenovo xClarity software components
  - Check compliance with VX Best Recipes
- Handover
  - BAU updates based on VCF releases and VX Best Recipes
  - VMware Async Patch Tool (if required)
- Readiness Handover
  - Create handover document and knowledge transfer
  - Includes details for each deployed component

The following table lists ThinkAgile Health Check & Deployment offerings are available for ThinkAgile VX customers. These offerings are performed by Lenovo Professional Services.

- **Onsite Deployment:** Install, configure, and validate solution on-site, and conduct knowledge transfer.
- **Remote Deployment:** Install, configure, and validate solution remotely, and conduct knowledge transfer.
- **Remote Health Check:** Report & remediation of hardware and cluster health issues, including firmware and software updates.

Table 15. ThinkAgile Deployment offerings

Part number	Description
<b>Onsite deployment services</b>	
5MS7B00082	ThinkAgile VX Onsite Deployment (up to 4 nodes)
5MS7B00083	ThinkAgile VX Onsite Deployment (additional node)
<b>Remote deployment services</b>	
5MS7A87711	ThinkAgile VX Remote Deployment (up to 4 nodes)
5MS7A87712	ThinkAgile VX Remote Deployment (additional node)
<b>Remote Health Check</b>	
5MS7B00178	ThinkAgile VX 1X Remote Health Check (up to 4 node cluster)
5MS7B00179	ThinkAgile VX 1X Remote Health Check (additional node)
5MS7B00059	ThinkAgile VX 1X Remote Health Check & Update (up to 4 node cluster)
5MS7B00060	ThinkAgile VX 1X Remote Health Check & Update (additional node)

## **Lenovo TruScale**

Lenovo TruScale XaaS is your set of flexible IT services that makes everything easier. Streamline IT procurement, simplify infrastructure and device management, and pay only for what you use – so your business is free to grow and go anywhere.

Lenovo TruScale is the unified solution that gives you simplified access to:

- The industry's broadest portfolio – from pocket to cloud – all delivered as a service
- A single-contract framework for full visibility and accountability
- The global scale to rapidly and securely build teams from anywhere
- Flexible fixed and metered pay-as-you-go models with minimal upfront cost
- The growth-driving combination of hardware, software, infrastructure, and solutions – all from one single provider with one point of accountability.

For information about Lenovo TruScale offerings that are available in your region, contact your local Lenovo sales representative or business partner.

## Regulatory compliance

The server conforms to the following standards:

- ANSI/UL 62368-1
- IEC 62368-1 (CB Certificate and CB Test Report)
- CSA C22.2 No. 62368-1
- Argentina IEC 62368-1
- Mexico NOM-019
- India BIS 13252 (Part 1)
- Germany GS
- TUV-GS (EN62368-1, and EK1-ITB2000)
- Brazil INMETRO
- South Africa NRCS LOA
- Ukraine UkrCEPRO
- Morocco CMIM Certification (CM)
- Russia, Belorussia and Kazakhstan, TP EAC 037/2016 (for RoHS)
- Russia, Belorussia and Kazakhstan, EAC: TP TC 004/2011 (for Safety); TP TC 020/2011 (for EMC)
- CE, UKCA Mark (EN55032 Class A, EN62368-1, EN55035, EN61000-3-11, EN61000-3-12, (EU) 2019/424, and EN IEC 63000 (RoHS))
- FCC - Verified to comply with Part 15 of the FCC Rules, Class A
- Canada ICES-003, issue 7, Class A
- CISPR 32, Class A, CISPR 35
- Korea KS C 9832 Class A, KS C 9835
- Japan VCCI, Class A
- Taiwan BSMI CNS15936, Class A; CNS15598-1; Section 5 of CNS15663
- Australia/New Zealand AS/NZS CISPR 32, Class A; AS/NZS 62368.1
- UL Green Guard, UL2819
- [Energy Star 4.0](#)
- EPEAT (NSF/ ANSI 426) Bronze
- Japanese Energy-Saving Act
- EU2019/424 Energy Related Product (ErP Lot9)
- TCO Certified
- China CCC certificate, GB17625.1; GB4943.1; GB/T9254
- China CECP certificate, CQC3135
- China CELP certificate, HJ 2507-2011

## Lenovo Financial Services

Why wait to obtain the technology you need now? No payments for 90 days and predictable, low monthly payments make it easy to budget for your Lenovo solution.

- **Flexible**

Our in-depth knowledge of the products, services and various market segments allows us to offer greater flexibility in structures, documentation and end of lease options.

- **100% Solution Financing**

Financing your entire solution including hardware, software, and services, ensures more predictability in your project planning with fixed, manageable payments and low monthly payments.

- **Device as a Service (DaaS)**

Leverage latest technology to advance your business. Customized solutions aligned to your needs. Flexibility to add equipment to support growth. Protect your technology with Lenovo's Premier Support service.

- **24/7 Asset management**

Manage your financed solutions with electronic access to your lease documents, payment histories, invoices and asset information.

- **Fair Market Value (FMV) and \$1 Purchase Option Leases**

Maximize your purchasing power with our lowest cost option. An FMV lease offers lower monthly payments than loans or lease-to-own financing. Think of an FMV lease as a rental. You have the flexibility at the end of the lease term to return the equipment, continue leasing it, or purchase it for the fair market value. In a \$1 Out Purchase Option lease, you own the equipment. It is a good option when you are confident you will use the equipment for an extended period beyond the finance term. Both lease types have merits depending on your needs. We can help you determine which option will best meet your technological and budgetary goals.

Ask your Lenovo Financial Services representative about this promotion and how to submit a credit application. For the majority of credit applicants, we have enough information to deliver an instant decision and send a notification within minutes.

## Seller training courses

The following sales training courses are offered for employees and partners (login required). Courses are listed in date order.

### 1. **Lenovo VTT Cloud Architecture: How VCF 9 delivers a Modern Sovereign Private Cloud with Intel Xeon 6 on ThinkAgile VX**

2025-08-22 | 84 minutes | Employees and Partners

Join Lenovo, Intel and VMware by Broadcom SMEs and learn how the next generation of VMware Cloud Foundation 9.0 is the ideal platform for customers to implement a modern private cloud. They will demonstrate simplified deployment, operations and cloud developer experience to run traditional, mission critical workloads as well as new AI workloads and containerized applications all in one unified, resilient and secure platform. VCF 9 is supported on the latest Intel Xeon 6 processors that are now available on ThinkAgile VX V4 systems

Tags: Architecture, Engineering & Construction, Artificial Intelligence (AI), Cloud, ThinkAgile, VMware

Published: 2025-08-22

Length: 84 minutes

#### **Start the training:**

Partner link: [Lenovo 360 Learning Center](#)

Course code: DVCLD226

### 2. **Unlock the full potential of AI in your organization with a private and secure solution that leverages your own data**

2025-06-26 | 61 minutes | Employees and Partners

Join Scott Stricker, World-Wide Leader for Advanced Services within the VMware Cloud Foundation Division and Alex Fanous Advanced Services Architects VMware Cloud Foundation Org at VMware by Broadcom as they lead us in this session. We'll explore the critical need for a private AI solution that enables enterprises to serve AI models with confidence, while maintaining control over their sensitive data and adhering to operational governance & standards. We'll discuss the benefits of a Lenovo-VMware joint solution, including robust lifecycle management, agility, and the ability to deliver AI outcomes that drive business success. We'll also delve into real-world use cases and identify the new personas within our customers' business that will be the consumers of these AI services, and how they can benefit from a private AI foundation. Join us for this technical deep dive into the solution, including a live demonstration, to see how you can harness the power of AI while protecting your organization's most valuable assets and wrangle the cost of today's most expensive workload.

### 3. ThinkAgile VX in 3 minutes

2025-06-18 | 5 minutes | Employees and Partners

Learn about ThinkAgile VX in under 3 minutes. The business challenges it solves and how it can increase the size of your sales opportunities.

By the end of this training, you should be able to:

- 1) Learn how to sell Lenovo ThinkAgile VX
- 2) Describe what differentiates ThinkAgile VX from other VMware offerings

### 4. Lenovo Data Center Product Portfolio

2025-06-11 | 20 minutes | Employees and Partners

This course introduces the Lenovo data center portfolio, and covers servers, storage, storage networking, and software-defined infrastructure products. After completing this course about Lenovo data center products, you will be able to identify product types within each data center family, describe Lenovo innovations that this product family or category uses, and recognize when a specific product should be selected.

Course objectives:

1. Identify product types within each data center family
2. Describe the features of the product family or category
3. Recognize when a specific product should be selected

## 5. VTT: Nutanix Integration in XClarity One - SAM - May 2025

2025-06-10 | 56 minutes | Employees Only

Please join this session as our speaker Sorin Tacu, will be sharing us a preview of SAM (Solutions Advanced Manager) - a powerful new tool developed by the ThinkAgile HX team in collaboration with XClarity One. Designed to seamlessly integrate the Nutanix Solution into XClarity One, SAM is set to streamline solution management and drive greater value for our customers. Get a first look at its future capabilities and learn more about it.

## 7. Family Portfolio: ThinkAgile Systems

2025-04-30 | 45 minutes | Employees and Partners

This course covers the foundational components of the ThinkAgile family, including server configurations, key system differences, and the unique features of the HX, MX, and VX product families.

By the end of this course, you should be able to:

- List the ThinkSystem and ThinkEdge servers that the ThinkAgile family is based on
- Explain the difference between Certified Nodes and Integrated Systems
- List two features each of the HX, MX, and VX families

## 10. ThinkAgile VX - How to sell

2024-12-18 | 15 minutes | Employees and Partners

This module will introduce you to the ThinkAgile VX product line. It also introduces the latest updates to the VMware software packages available with the ThinkAgile VX product line.

Course Objectives:

1. Find out more about the competitive advantage of ThinkAgile VX.
2. Learn about the hardware and software solutions in the ThinkAgile VX line.
3. Understand the business needs and how you can sell more.

## 13. ThinkAgile Solutions for AI - Security and Compliance Considerations

2024-10-01 | 15 minutes | Employees and Partners

This course, tailored specifically for Lenovo and its partner technical sellers, is designed to equip participants with essential knowledge and skills to effectively assess security measures and address compliance considerations for ThinkAgile Solutions for AI.

Upon completion of this training, you will be able to:

- Describe security features of ThinkAgile for AI data protection.
- Explain how to mitigate risk and address compliance considerations in AI deployments.

#### 14. Integration of ThinkAgile and AI

2024-09-11 | 25 minutes | Employees and Partners

Designed specifically for Lenovo and its partner technical sellers, this course aims to equip you with the knowledge and skills to effectively communicate the integration of ThinkAgile Solutions and AI.

Upon completion of this training, you will be able to:

- Highlight the advantages of using ThinkAgile for AI workloads
- Explore how ThinkAgile platforms are specifically optimized for AI

#### 15. Key Features of Lenovo ThinkAgile Solutions for AI

2024-09-10 | 15 minutes | Employees and Partners

Designed specifically for Lenovo and its partner technical sellers, this course aims to equip you with the knowledge and skills to effectively communicate the key features of ThinkAgile Solutions for AI. By completing this course, you'll be better prepared to understand customer needs and present the most suitable AI solutions, ensuring successful engagements and driving value for your clients.

In this course, you will learn how to:

- Present compute capabilities for AI processing
- Articulate optimized storage solutions with ThinkAgile for high-speed AI performance
- Identify essential networking considerations for ThinkAgile AI workloads
- Present ThinkAgile AI Ready solutions

## 16. ThinkAgile Solutions for AI - Sales Strategies and Messaging

2024-09-06 | 15 minutes | Employees and Partners

This course is designed exclusively for Lenovo and its partner technical sales teams, with the goal of empowering you with the knowledge and strategies necessary to effectively engage customers in conversations about ThinkAgile Solutions for AI.

In this course, you'll learn how to:

- Identify customer pain points.
- Recommend ThinkAgile Solutions for AI tailored to those needs. And lastly,
- Communicate the benefits of ThinkAgile for AI to key stakeholders.

## 17. Position Lenovo ThinkAgile Solutions for AI

2024-08-19 | 10 minutes | Employees and Partners

Designed specifically for Lenovo and partner technical sellers, this course aims to equip you with the knowledge and skills necessary to effectively evaluate and position ThinkAgile Solutions for AI to your customers. By completing this course, you will be better prepared to understand customer needs and present the most suitable AI solutions, ensuring successful engagements and driving value for your clients.

In this course, you will learn how to position ThinkAgile Solutions for AI to your customers by:

- Evaluating the key challenges in the enterprise landscape
- Advocating the value proposition of ThinkAgile Hyper-Converged Infrastructure
- Exploring use cases of ThinkAgile in AI environments
- Implementing ThinkAgile-based AI deployments

**18. Lenovo VTT Cloud Architecture - Unlock Gen AI with VMware Private AI Foundation with NVIDIA**  
2024-07-16 | 60 minutes | Employees and Partners

In today's rapidly evolving digital landscape, businesses are hungry for the transformative power of Artificial Intelligence (AI). They see AI as the key to streamlining operations and unlocking exciting new opportunities. However, widespread adoption has been hampered by concerns surrounding privacy, the complexity of implementation, and the hefty costs associated with deploying and managing AI solutions at an enterprise level.

Join Chris Gully and Baker Hull, Solutions Architects from VMware by Broadcom, as they discuss how Lenovo, NVIDIA, and VMware By Broadcom are partnering to deliver a private, secure, scalable, and flexible AI infrastructure solution that helps enterprise customers build and deploy AI workloads within their own private cloud infrastructure, ensure the control of sensitive data and compliance with regulatory requirements, ultimately driving faster time to value and achieving their AI objectives.

## 22. Technical Overview: ThinkAgile HCI and Cloud Platforms

2024-03-07 | 35 minutes | Employees and Partners

This course is designed to give Lenovo sales and partner representatives a technical overview of Lenovo's ThinkAgile hyperconverged infrastructure and cloud platforms. Turnkey cloud platforms along with their architectural makeup, and container and data protection solutions are also covered.

Learning Objectives:

- Describe Lenovo's ThinkAgile hyperconverged infrastructure and cloud platforms
- Explain do-it-yourself and turnkey cloud platforms along with their architectural makeup
- Describe container and data protection solutions

**24. VTT Cloud Architecture: Google Cloud Platform with Anthos on ThinkAgile VX - October 2023**  
2023-10-11 | 54 minutes | Employees and Partners

Join Chandrakandh Mouleeswaran, Lenovo Senior Software Engineer and Cristian Ghetau, Lenovo Software Engineer for a discussion on Google Cloud Platform (GCP) with Anthos solution based on the Lenovo ThinkAgile VX VMware vSAN certified platform. They will cover a technical overview of Google Kubernetes Engine (GKE) On-prem, which is a containerized workload orchestration software. We will cover the functional aspects of Anthos core components including the Kubernetes, Istio service mesh, Anthos config management, Hybrid and multi-cloud management, and Google cloud marketplace. We will also provide an architecture overview and deployment of Anthos on top of Lenovo ThinkAgile VX hyperconverged infrastructure (HCI) platform. Cristian and Chandrakandh will cover customer use cases for Anthos, including Continuous Integration/Continuous Delivery (CI/CD), Micro-services and Service Mesh, Hybrid Cloud and Multi-cloud management, and Anthos Config Management.

## 26. VTT Cloud Architecture - Application Migration September 2023

2023-09-12 | 35 minutes | Employees Only

This VTT Cloud Architecture training aims to equip participants with the knowledge necessary to help your customers successfully migrate applications to a cloud infrastructure. With the increasing adoption of cloud computing, organizations are looking to harness the benefits of private and hybrid clouds, such as enhanced security, control, and customization. However, migrating applications to cloud requires careful planning, architectural considerations, and a deep understanding of the migration process.

In this training, we will delve into cloud infrastructure and learn about the key components involved in application migration. We will explore various migration strategies, including lift-and-shift, re-platforming, and re-architecting, and understand the factors that influence the selection of an appropriate migration approach. We will also cover best practices for evaluating application readiness, assessing dependencies, identifying potential challenges and risks, and solution design considerations.

We will discuss using migration tools, technologies specific to cloud environments and automation techniques for streamlining the migration process, ensuring minimal disruption to business operations.

## 27. VTT Cloud Architecture - DevOps Cloud Story August 2023

2023-08-17 | 60 minutes | Employees Only

Understanding how architecture is deployed to support DevOps environment in the cloud. Tanzu/Containers vs VM's. When it best to use each? Modern Application deployment in containers. In the beginning, public cloud IaaS was delivered exclusively via virtual machines. But today, new virtualization methods are taking hold, including containers and serverless computing. As cloud computing principles become more embedded in application development and infrastructure operations, containers and serverless will become increasingly attractive deployment vehicles for code. From requirements to installation.

### 30. ThinkAgile VX Series - Technical Presentation

2023-07-12 | 60 minutes | Employees and Partners

Join us in this comprehensive course on ThinkAgile VX Series, where you will gain a deep understanding of its technical overview and components. Dive into the world of Data Processing Units (DPUs) and explore their technical aspects, including their role and benefits. Unlock the potential of ThinkAgile VX Series through a detailed exploration of its versatile use cases, ranging from Hybrid Cloud deployment to VDI, Kubernetes, and AI/ML applications. Moreover, you will learn about effective deployment strategies and lifecycle management processes.

By the end of this training, you should be able to:

- Understand the technical overview of ThinkAgile VX Series
- Gain knowledge about DPU (Data Processing Unit) and its technical aspects
- Explore various use cases of ThinkAgile VX Series, including Hybrid Cloud deployment, VDI (Virtual Desktop Infrastructure), Kubernetes, and AI/ML (Artificial Intelligence/Machine Learning)
- Describe deployment strategies and lifecycle management processes for ThinkAgile VX Series

### 31. Cloud and HCI or Somewhere in Between

2023-07-11 | 40 minutes | Employees and Partners

Provides a brief overview of Lenovo Portfolio for HCI and Cloud including ThinkAgile HX, VX, MX Certified Nodes and Appliances, Azure, and Engineered Cloud Solutions. Review Scenarios and complete questions "choose your own adventure" to identify and qualify an opportunity as HCI or Cloud and which portfolio solution would be the best option.

Course objectives:

- Where in the Sales Cycle we are
- What is Cloud
- What is Hyperconverged Infrastructure (HCI)
- Review Lenovo Offerings in Cloud and HCI
- Scenarios

## 32. Improve Storage Performance with VMware vSAN ESA on Lenovo ThinkAgile VX Series

2023-05-26 | 10 minutes | Employees and Partners

Explore VMware's vSAN 8 release and Lenovo's ThinkAgile VX series in this comprehensive course. Discover how the Express Storage Architecture (ESA) revolutionizes storage by eliminating caching tiers and leveraging storage pools. Learn about hardware requirements, VMware certifications, and Lenovo's Configurator for successful ESA implementation. Enhance your storage performance and optimize your infrastructure. Enroll now to unlock the potential of vSAN 8 and ESA on ThinkAgile VX.

By the end of this training, you should be able to:

- Understand the benefits of VMware's vSAN 8 release and Express Storage Architecture (ESA)
- Recognize the hardware requirements and prerequisites for implementing ESA
- Explore how Lenovo Think Agile VX series supports the implementation of ESA

## 33. Day 0 Operations with ThinkAgile VX

2023-05-25 | 10 minutes | Employees and Partners

Discover the power of the ThinkAgile VX Deployer in this comprehensive course. Learn to easily deploy and configure ThinkAgile VX Integrated Systems using step-by-step instructions and practical demonstrations. Explore key features, such as vCenter configuration, integration with Lenovo XClarity Integrator, and efficient software installations. Master the deployment process, streamline operations, and optimize your cluster environment.

By the end of this training, you should be able to:

- Understand the purpose and capabilities of the ThinkAgile VX Deployer
- Recognize the benefits of using the Lenovo XClarity Integrator
- Comprehend the steps involved in deploying a cluster with ThinkAgile VX Deployer
